

OOTB Device Management

Out-of-the-box (OOTB) Device Management

The Axiros AX69 product line offers effortless device management at your fingertips. One single platform to troubleshoot devices, manage their firmware and configure internet access, network and telephony services.

AX69 is available as SaaS through the cloud or as on-premises solution.

Control your device fleet

- Know your devices, their location and status at any time

Manage firmware

- Get insights about the firmware versions installed
- Schedule and monitor all firmware upgrades remotely

Take diagnostics and troubleshooting to the next level

- Realtime updates about connectivity status and service quality
- Remote internet connection tests, reboots or device resets

Get the functionality you want

- Internet access
- Telephony
- Network and WiFi settings - all done via remote device configuration

Summary of managed network and telephony devices

The screenshot displays the AX69 CLOUD dashboard with the following components:

- Dashboard Overview:** Shows 0 Campaigns, 420 Tickets, and two donut charts for online status: 97.03% Online last day (294 devices) and 97.69% Online last week (296 devices).

Inventory search helps finding devices by e.g. online status or software version

OOTB Device Management

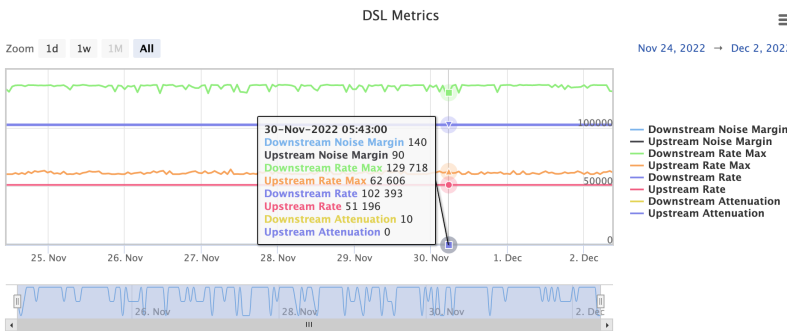

AX69 Benefits

AX69 is based on the AXESS device management platform, which has been used by many of the world’s leading carriers and service providers for more than 10 years.

It's a perfect fit for any kind of small and medium business as well as for Service Providers to manage their network and telephony devices in an easy yet secure way.

- Integrate device management directly into your backend applications through an extensive set of APIs
- Drastically reduce service costs due to the cutting edge architecture
- Benefit from our regular platform upgrades, introducing new supported devices and useful features
- Smooth and secure system operation is guaranteed
- Professional support from our skilled engineers
- Data privacy according to German GDPR
- Made in Germany, engineered by Axiros

AX69 CLOUD - our cloud born ACS service offering

- Reduced service costs: no additional costs for hardware, software, and staff to manage the infrastructure – all covered by the subscription fee
- Minimum initial costs – while delivered on a subscription basis, AX69 almost eliminates the initial costs
- Stop using, stop paying: terminate your contract when you no longer require the service
- Zero deployment time: your service will be launched within minutes
- Zero upgrade time: we manage all platform upgrades without service interruptions for you

AX69 ON-PREMISES - our ready to use ACS solution as on-premises installation

- Easy to install ACS hosted inside your infrastructure
- Rapid deployment and upgrades due to its architecture and OOTB functionality: the product can be installed and upgraded faster and easier than ever before
- Privacy: deployed at the customer premises, all data stays inside the customer network
- Scalability: easily scale up and down the system as your demands change
